EMPLOYEES STOCK OPTION  
SCHEME - 2019

## PART A: STATEMENT OF RISKS

*An investment in Equity Shares involves a high degree of risk. You should carefully consider all the information in this Scheme, including the risks and uncertainties described below, before making an investment in the Equity Shares. If our business, profitability and financial condition gets affected, the price of our Equity Shares could decline, and you may lose all or part of your investment in the Equity Shares. Unless specified or quantified in the Scheme, we are not in a position to quantify the financial or other implication of any of the risks. ESOPs are subject to the following additional risks:*

1. **Concentration:** The risk arising out of any fall in value of shares is aggravated if the Employee's holding is concentrated in the shares of a single Company.
2. **Leverage:** Any change in the value of the share can lead to a significantly larger change in the value of the option as an option amounts to a leveraged position in the share.
3. **Illiquidity:** The options cannot be transferred to anybody, and therefore Employees cannot mitigate their risks by selling the whole or part of their options before they are exercised.
4. **Vesting:** The options will lapse if the employment is terminated prior to vesting. Even after the options are vested, the unexercised options may be forfeited if the Employee is terminated for gross misconduct.
5. **Market Risk:** The Employee can experience losses due to factors that affect the overall performance of the financial markets, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers, political turmoil, recessions, changes in interest rates and terrorist attacks.

### 2. Financial Information:

The financial information of the Company for the last 4 (Four) years will be provided along with the Grant letters to be given to the Employees at the time of grant of options to the Employee.

### 3. Risk Factors for the Company:

The Management of the Company has a perception that the following risks or uncertainties may occur during the course of business such as:

- i ***We are dependent on our ability to develop new services and products, and enhance our existing services and products:*** Rapid technological advances, changing delivery models and evolving standards in software development and communications infrastructure, changing and increasingly sophisticated customer

needs and frequent new product introductions and enhancements characterise the industry in which we operate. Digitization is driving major changes in the global business software market, with IT leaders looking to adopt new technologies and software platforms to meet business needs, including revenue growth driven through new products and services, better customer experience and delivery mechanisms, and growth in revenue and profits. Our success depends upon our ability to anticipate, design, develop, test, market, license and support new software products, services, and enhancements of current products and services in response to evolving industry requirements. The software industry is increasingly focused on cloud computing, mobility, social media and platform as a service among other continually evolving trends. In addition, our products, services, and enhancements must remain compatible with standard platforms and file formats. Often, we must integrate software licensed or acquired from third parties with our proprietary software to create or improve our products. If we are unable to successfully integrate third party software to develop new software products, services, and enhancements to existing products and services, or to complete the development of new products and services which we license or acquire from third parties, our operating results will materially suffer. If we are unable to develop new or sufficiently differentiated products and services, enhance our product offerings and support services in a timely manner or position and price our products and services to meet demand including in response to new industry standards, customers may not purchase or subscribe to our software products or cloud offerings or renew software support or cloud subscription contracts. Renewals of these contracts are important to the growth of our business.

- ii **The business practices of our customers with respect to the collection, use and management of personal information could give rise to operational interruption, liabilities or reputational harm as a result of governmental regulation, legal requirements or industry standards relating to consumer privacy and data protection:**As regulatory focus on privacy issues continues to increase and global laws and regulations concerning the handling of personal information expand and become more complex, potential risks related to data collection and use within our and our customers' business will intensify. In addition, many governments have enacted or are considering enacting legislation or regulations, or may in the near future interpret

existing legislation or regulations, in a manner that could significantly impact our ability and that of our customers and data partners to collect, augment, analyse, use, transfer and share personal and other information that is integral to certain services we provide. This could be true particularly in those jurisdictions where privacy laws or regulators take a broader view of how personal information is defined, therefore subjecting the handling of such data to heightened restrictions that may be obstructive to our operations of that of our customers and data providers. For instance, Directive 95/46/EC or the Data Protection Directive in the European Union has been replaced by the European General Data Protection Regulation in May 2018, which imposes additional obligations and risks upon our business with respect to processing of personal data and on the free movement of such data.

We may expand our operations to countries which have passed or are considering passing legislation that requires data to remain localised “in country,” as this imposes financial costs on any service provider that is required to store data in jurisdictions not of its choosing and non-standard operational processes that are difficult and costly to integrate with global processes. Changes in laws or regulations associated with the enhanced protection of certain types of sensitive data could greatly increase our cost of providing our products and services or even prevent us from offering certain of our products and services in jurisdictions that we operate. For instance, the Supreme Court of India decided in a judgment that right to privacy is a fundamental right. Consequently, a data protection regime is a legitimate concern of the Government of India and the ruling may lead to reconsideration and reconfiguration of India's data protection model.

Regulators globally are also imposing greater monetary fines for privacy violations and some regulators may pass legislation that would impose fines for privacy violations based on a percentage of global revenues. Responding to an investigation or enforcement action could divert attention and resources of our management, which would cause us to incur investigation, compliance and defence costs and other professional fees, and adversely affect our business, operating results, financial condition and cash flows.

Any systems failure or security breach or lapse on our part or on the part of our employees and other ecosystem participants that results in the release of user data could harm our reputation and brand and, consequently, our business, in addition to exposing us to potential legal liability. Any such legal proceedings or actions may subject us to significant penalties and negative publicity, require us to change our business practices, increase our costs and severely disrupt our business.

Additionally, public perception and standards related to the privacy of personal information can shift rapidly, in ways that may affect our business operations or influence regulators to enact regulations and laws that may limit our ability to provide certain products and services. Any failure or perceived failure by us to comply with Indian or foreign laws and regulations, including laws and regulations regulating privacy, data security, or consumer protection, or other policies, public perception, standards, self-regulatory requirements or legal obligations, could result in lost or restricted business, proceedings, actions or fines brought against us or levied by governmental entities or could adversely affect our business and our reputation.

Further, the costs of compliance with, and other conditions imposed by laws, regulations and policies that are applicable to the businesses of our customers may limit the use and adoption of, and reduce the overall demand for, our products and services. Privacy and personal information security concerns may inhibit market adoption of our products and services, particularly in certain industries and foreign countries. Any such changes in the laws of any of the markets in which we operate or intend to in the future may adversely affect our results of operations and business prospects.

- iii **We may become liable to our customers and lose customers if we have defects or disruptions in our service or if we provide poor service.** We deliver technology as a service, and errors or defects in the software applications underlying our services, or a failure of our hosting infrastructure, may make our services unavailable to our customers. Any errors, defects, disruptions in service or other performance problems with our services, whether in connection with the day-to-day operation of our services, upgrades or otherwise, could damage our customers' businesses.

*If we have any errors, defects, disruptions in service or other performance problems with our services, our customers could elect not to renew our contract, or delay or withhold payments to us and we could lose future sales. Further, our customers may make claims against us, which could result in an increase in our provision for doubtful accounts, an increase in collection cycles for accounts receivable or litigation costs. All these factors could adversely affect our business and results of operation.*

Apart from the above other risks and uncertainties include but are not limited to risk and uncertainties regarding dependencies on the few customers and suppliers, changes in the regulatory framework, adverse development in the any of the customer industries to whom substantial part of the product is given, downgrading of our credit worthiness, political instability, legal restrictions and general economic conditions affecting our industry.

**4. Continuing Disclosure Requirement:**

The Grantee would be entitled to receive copies of all documents that are sent to the members of the Company. This shall include the annual accounts of the Company as well as notices of the meetings and the accompanying explanatory statements. However, the Grantee will not be entitled to attend and vote in the meeting or receive any dividend in respect of unexercised options.
